

What do **YOU** like?

You learn many things at school: Maths, English, German, Italian, Art, Music, Religion, Geography, History, Biology, Sports ...

Students like some subjects, but do not like other subjects:

My favourite subjects are German, English and Italian. I love reading books. And I write my own stories!

Art is great! We can be creative and we don't have tests!

I do not like languages. I hate speaking in front of my class. I prefer Maths!

I like Geography, because I like the teacher. He makes the lessons interesting. But I do not like History. It is so boring!

What about you?

What are your **favourite subjects** at school?

Why do you like them so much?

What **subjects do you not like**?

Why do you not like these subjects?

In your opinion, **what makes a lesson interesting?**

We, the researchers of the EURAC, want your opinion as an expert! **Write a text** about the subjects you like and do not like at school!

You have 20 minutes.
